

Here is a helpful sheet with the measurements for fabric cuts in both metric (metres) and yards and inches. Most quilt patterns publish the fabric requirements in yards, however, in many countries including the UK we buy fabric in by the metre (or portion of).

The first section gives you the measurements of the main fabric cuts where buying in metres. I have also given the approx. inches amount. The second section shows the measurements if buying from the USA or in yards. I have converted these to metres/ centimetres for reference.

Buying in Metres & cms

Buying in Yards & Inches
